

Real Life is Touring The United States, South America and The Philippines 2008

REAL LIFE formed in Melbourne Australia during the early eighties. After working six nights a week, building a local following for a couple of years, we released our first record **Send me an Angel**, from our first album Heartland. The song was a big hit in most parts of the world. Other singles from that Album were Openhearted, **Catch me I'm Falling** and **Always**. Our second album Flame, didn't do so well however, the first single Face to Face was a minor hit. Four years after it was recorded, we had a second hit single from that album, with a remix of **Let's Fall in Love**. In 1986 we scored a U.S. alternative hit with a song called **Babies**. Our Australian record company refused to release the song in Australia., However in Most of America is was a top 40 Hit, in South America and Japan as well.

In 1998 Send Me an Angel was a US hit for a second time. In 1990 we released an album called Lifetime featuring the alternative radio and dance chart hits **God Tonight** and **Kiss The Ground**.

In 1997 a new landscape for the album HAPPY and the remix HAPPIER album. It's the best record we'd made until IMPERFECTION came along in 2003.

July 2003 saw the release of our most recent album IMPERFECTION and are currently writing some new stuff for a new Real Life release. we have just finished a successful tour of America this past July and August 2007 being a part of the **"Lost 80's Live"** tour along with **WHEN IN ROME** we plan to tour the states, South America and The Philippines in 2008 along with **WHEN IN ROME**

We are alive and well. We still love what we do
