

# BLACK ANTS

- The black ant is found all over Europe and in some parts of North America and Asia.
- The queen can live up to around 15 years and some have lived for 30 years.
- Black ant colonies can reach up to around 40,000 workers but 4,000–7,000 is around average.
- Ants mate while flying, so “flying ants” are males and immature queens. Once the queens have mated they will land and detach their wings and begin to find a place to dig a tunnel.

Power: 110 VAC 60 Hz @ 2.1 Amps

Compressed Air: 2.0 CFM refrigerated (dry) @ 110 PSI

Weight: 600 lbs. (273 kg) (approx.)

Overall length: 7' (2.14 m), Length off the front: n/a, Length off the back: n/a
