

Arizona Sunset Silhouette

What you will need:

Coffee filter

Black cardstock or Construction Paper

Scissors

Markers

Glue

Using the markers, draw lines across the coffee filter from one end to the other. Make sure all your lines are going the same way

Once you have made your lines across the entire coffee filter, spray the coffee filter with a little bit of water. Be careful – you don't want the coffee filter to be soaked with water. Only spray 2-3 times

Let the coffee filter dry for 1-2 minutes

Glue the coffee filter in the middle of the black cardstock

Use scraps or little pieces of black cardstock to create any shapes you want in your sunset. Animals, cactus, mountains, buildings – anything!
