

## Tree Observation

Choose a tree that you would like to observe and make yourself comfortable where you can see the tree well.

Observe your tree very closely. Using a drawing and/or detailed description, answer the following questions

- Where is it located?
- What is the shape of the tree?
- Does it have any fruits, nuts, cones or flowers? What do they look like?  
What color are they?
- What do the leaves look like? How are they arranged on the branch?
- What does the bark look like?
- What other characteristics do you notice?
