

CZ2U: Vet Diagnosis

Part of the initial challenge when receiving a new patient, is determining what is wrong with the animal. There are a variety of tools that can help veterinarians, such as using x-rays and ultrasound images to see what might be going on inside of an animal. Take a close look at these x-ray films and see if you can determine what the animal is and what problem it could have.

	Animal?	Problem?	Solution/Treatment Ideas?
X-Ray 1			
X-Ray 2			
X-Ray 3			
X-Ray 4
