

Fun Activities

(AGES 10 AND UP)

Continue the Conversation

The Savannah habitat is home to 10 different species of animals. How can that many animals live together without competing?

Everyone is good at something!
What are you good at? Track and Field?
Hide and seek?
Or maybe you're a problem solver?
Are you good at figuring out games or puzzles?
What kind of animal would you
be with those skills?
How would your skills help you survive?

What is your favorite animal?
What habitat does it live in?
Is there anything you can do to make sure
your favorite animal has everything
it needs to survive?
For example; if you love sea turtles then
an easy way to help is by not using
plastic straws.
Can you find a way to help your animal?
